

A man in a red jacket and a colorful beanie with a pom-pom is looking out over a vast, snowy mountain range. The scene is captured in a cinematic style with soft lighting, suggesting a sunrise or sunset. The man is wearing a red jacket with black accents and black gloves. The background features jagged, snow-covered mountain peaks under a clear sky.

BACKPACKS

SAFI 45

SIZE

COLORS 

45 liters,
gray/deep red,
gray/deep ocean

Advanced, technical backpack for all climbing use with ergonomic carrying system.

- 1 big compartment;
- 1 lid pocket, 1 front pocket;
- trekking poles and ice axe attachments points;
- 2 mesh pockets;
- adjustable chest strap and waist belt;
- long compression straps for a karrimat;
- hydration system compatible;
- integrated raincover.

Carrying system:
flexible preformed pad (P-formula)

Fabric: MIDORA PRO

MGARR 35

SIZE

COLORS 

35 liters,
gray/deep red,
gray/deep ocean

Comfortable and functional mountaineering backpack for few day mountain trips.

- adjustable and detachable lid
- 4 side compression straps
- front zip for easy backpack access
- 2 trekking pole attachment loops
- 2 ice axe attachment points
- small zipped inner pocket
- mesh hip belt for better ventilation
- additional mesh pocket on hip belt
- removable aluminum frame

Fabric: MIDORA PRO

COROICO 25+3

SIZE

COLORS 

25+3 liters,
gray/deep red,
gray/deep ocean

Medium sized backpack with zipped volume adjustment. Its regular, compact shape makes it applicable for mountain sports like trekking, mountain biking or ski touring. Equipped with effective side compression straps, trekking pole attachment points, spacious, adjustable main compartment with hydration pocket, 1 front pocket with organizer, 1 front pocket for map, 2 deep side mesh pockets and adjustable, flexible hip belt with 2 small mesh pockets. 3 hypalon pads at the front can be turned into additional attachment points.

Fabric: MIDORA PRO

ENTU 20

SIZE

COLORS 

20 liters
gray/deep red,
gray/deep ocean

Smart daypack with comfortable carrying system and features enabling short trekking use

- 1 compartment;
- 1 spacious front pocket;
- trekking poles attachments points;
- 2 mesh pockets;
- adjustable chest strap,
- simple waist belt;
- reflective piping;
- hydration system compatible.
- carrying system: EVA pads with air tunnel (T-formula)

Fabric: MIDORA PRO

KYRKO 12

SIZE 12 liters,
COLORS gray/deep red,
gray/deep ocean

Small hydration pack with a compartment for the most important items during running or cycling trainings.

- 1 main compartment;
- separate hydration pocket;
- 1 front pocket;
- trekking poles attachment points;
- adjustable chest strap, simple waist belt;
- reflective piping;
- hydration system compatible
- carrying system: EVA pads with air tunnel (T-formula)

MEYO

SIZE 10X20X7cm
COLORS gray/deep red,
gray/deep ocean

Small and simple hip bag with 2 zipped pockets to carry along the most important items.

HEFFO

SIZE 10X20X6cm
COLORS gray/deep red,
gray/deep ocean

Classic hip bag with wide, comfortable hip belt, spacious main compartment and 3 pockets.

AKRA

COLORS gray/deep red,
gray/deep ocean

Handy shoulder bag which fits a standard ipad. Features 2 front pockets for mobile phone and wallet, spacious, padded main compartment with numerous pockets and a adjustable shoulder strap.

INGU

SIZE 20X27X10cm
COLORS gray/deep red,
gray/deep ocean

Wash case with inner hook, mesh pockets and carrying handle.

WALLY

SIZE 14x11cm
COLORS gray/deep red,
gray/deep ocean

Small wallet with climbing design and numerous pockets available in 2 colours.

SOCKS

JAZA

SIZES M (38-41),
L (42-44),
XL (45-47)

Ski touring socks with thick and warm weave for comfort in low temperatures.

- *no pressure double welt;*
- *AirControl System for optimized ventilation of your feet;*
- *flatlock seams minimize skin abrasions;*
- *Y heel construction for perfect fit*

Fabric: 84% Merino Wool, 13% Prolen Siltex, 3% Lycra

AMEDI

SIZES M (38-41),
L (42-44),
XL (45-47)

Lightest Merino Wool socks for spring and summer trekking.

- *no pressure double welt;*
- *AirControl System for optimize ventilation of your feet;*
- *flatlock seams minimize skin abrasions;*
- *Y heel construction for perfect fit*

Fabric: 84% Merino Wool, 13% Prolen Siltex, 3% Lycra

KALAR

SIZES M (38-41),
L (42-44),
XL (45-47)

For winter trekking – thick weave for warm feeling.

- *no pressure double welt;*
- *AirControl System for optimized ventilation of your feet;*
- *flatlock seams minimize skin abrasions;*
- *Y heel construction for perfect fit*

Fabric: 84% Merino Wool, 13% Prolen Siltex, 3% Lycra

LEVAN

SIZES M (38-41),
L (42-44),
XL (45-47)

Running socks of medium height for intensive activities in summer temperatures.

- *no pressure double welt;*
- *AirControl System for optimized ventilation of your feet;*
- *flatlock seams minimize skin abrasions;*
- *Y heel construction for perfect fit*

Fabric: 85% Coolmax, 12% Polyamide, 3% Lycra

CRUISE TT

WEIGHT

670g

GRIP

ergonomic, cork

Basic 3-sections 6061 alloy trekking poles with antishock system, comfortable and durable grip for long walks or trekkings, easily adjustable length of maximum 135 cm and a pair of basic baskets. Compact size and weight are the assets of the reasonably priced, yet good quality set of poles.

CRUISE GT

WEIGHT

570g

GRIP

ergonomic, EVA

All-round 3-section trekking poles made of lightweight 7071 alloy. EVA handle along with 20 cm EVA tube provide multiple grip possibilities and 2 pairs of baskets help in difficult terrain conditions. Reliable Clip Lock length adjusting system helps to set the perfect position of the 135 cm long pole.

CRUISE FR

WEIGHT

550g

GRIP

extended, EVA

2 sections-poles made of 7001 alloy, designed for ski touring and freeriding. Ergonomic EVA grip plus 30 cm long EVA tube on the top section provide flexibility in demanding slope conditions. Equipped with regular and powder snow baskets. The maximum length of 140 cm is adjustable with stable Clip Lock system.

MEMBRANE

Gelanots® – membrane created by the Toyota Tsusho Corporation, one of the leading trading houses in Japan with leading technologies for waterproof, breathable fabrics for the sportswear, sportfashion and other high end apparel applications. Gelanots® quickly gained confidence of the newest generation fabrics' enthusiasts all over the world. This smart fabric is created in several versions, including the ones used by Milo Sport: • 3-layer Ultralight (80g/m²), where the outer ripstop layer is combined with breathable and waterproof membrane; • 3-layer Lightweight with mechanical Stretch (140g/m²). All versions of Gelanots® membranes have excellent waterproof performance up to 22.000mm/H₂O and breathability up to 70.000g/m²/24h. As a result of this, products provide an efficient moisture transport away from the body, avoiding process of condensation. Gelanots® laminates are not microporous so they retain their windproof, waterproof and breathable qualities independently from time of use.

Aquatex™ – these fabrics comprise a group of different materials covered with a layer of microporous polyurethane. This layer manages to achieve two opposing characteristics. Because particles of water are bigger than the micropores, Aquatex is waterproof and windproof. On the other hand, the molecules of vapour produced by a body during physical exertion are much smaller than the polyurethane micropores, so perspiration can permeate through the outer layer of material where it evaporates into the air. This effect is known as "breathability", maintaining a natural microclimate near the skin and reducing the sensation of overheating and discomfort due to moisture remaining between outer clothes and body

INSULATION

Primaloft® Sport – the perfect combination of high performance insulation and value. This technology combines ultra-fine and multi-diameter fibers for specific performance characteristics. The specially treated ultra-fine fibers help to form a water resistant insulating structure, while the multi-diameter fibers help to build loft. Primaloft® is currently one of the best alternatives to down. Milo Sport uses the most universal insulation weights: 100g/m² and 60g/m².

Softshell 2LF – 2-layer fabric constructed of 4-way stretch outer layer bonded to a fleece inner layer. It offers maximum freedom of movement combined with warmth, softness and wind protection.

Polartec® is a trade mark and registered in United States and in other jurisdictions for fabrics available only from Polartec Inc. "Times" magazine hailed Polartec® products one of the greatest inventions of the 20th century.

Polartec® Thermal Pro® Recycled – a group of knitted fabrics made of polyester fibers with excellent isothermal properties. The Thermal Pro® range offers unique insulation properties while moving the moisture away from the body. Very soft and breathable, they are rugged, do not change their outer appearance and are resistant to pilling. Since a few years we are using the environment friendly version of this fabric to give a little help to our mother-outdoor.

Polartec® 100 Micro – these fabrics are the standard for lightweight warmth and breathability. Tight knit construction features 100% polyester microfibrils and dries quickly. These durable, non-pilling fabrics maintain their insulation ability after repeated cleaning. 100 Micro fabrics keep you warm and comfortable in a wide range of conditions.

Polartec® Delta™ – was created so cooling fabric technologies could better utilize the body's natural cooling process: sweat. Next-to-skin fabrics that target wicking and fast drying will keep moisture moving, but don't work towards actually cooling the body down. Delta™ works more efficiently by elevating touch-points for increased airflow, faster moisture dispersal, and reduced wet-cling.

Nanoqpile – group of fabrics which are chosen and developed after targeted testing to get the best possible characteristics and performance, suitable for a broad spectrum of insulation appliances. They can be thermoactive and stretch when used for manufacturing performance garments (Nanoqpile Stretch), warm, skin friendly and appealing for manufacturing everyday jackets (Nanoqpile 2) or comfortable and technical for light weight fleece jackets (Nanoqpile 1).

TECHINCAL

Extendo – 4-way stretch fabric with a robust outer- and moisture regulating inner surface. Made from polyamide and elastane fibers (92% / 8%). Extendo dries rapidly is highly elastic, retains its shape and is light and breathable making it a first choice for all active travellers, trekkers and climbers.

Extendo WN – heavier and thicker version of Extendo. Increased density and warmer inner finishing make the fabric especially suitable for lower temperature use providing better wind and thermal protection. Used for production of garments for intense usage like ski touring, climbing etc.

Supplex® – fabric manufactured by Invista company that combines softness and grip of cotton and all best properties of polyamide. It is resistant to tearing and abrasion as well as breathable. Thanks to thin polyamide fibres used for manufacturing, it is up to 30 % softer than standard polyamide fabrics.

Cotton Stretch – a 4-way stretch cotton fabric with and addition of 5% elastane yarn. Thank to its great comfort, the fabric is a very good choice for manufacturing appealing climbing and bouldering garments.

Eclipse – group of lightweight, pilling resistant, technical knit fabrics with good moisture management, which wick moisture away from the body to the next layer of the clothing. Eclipse has a soft feel, dries rapidly and is very breathable. Available in different mixtures of polyester, elastane (Eclipse Stretch) and cotton (Eclipse Cotton).

Midora – fabric made of a mixture of polyester and polyamide fibres with 600D and 1000D thicknesses. Midora is highly durable and abrasion-resistant, making it excellent for backpacks, travelling and trekking accessories. It comes with a water resistant polyurethane coating.

Milo Sport reserves the right to modify any of the products presented in the catalogue, if it considers it appropriate. **Note:** Because of the limitations of the printing process, the colours of the products shown in this catalogue do not always match the real shades of fabrics used. Should any doubts arise, please consult the company. All products presented in the catalogue have the benefit of our two-year warranty for workmanship and fabrics. Warranty claims can only be considered upon submission of the warranty card attached to each product. Care should be taken while maintaining our products and the special, written instructions for use provided with each product should be followed. **Warranty conditions:** The warranty card allows the purchaser to exercise their rights, under the warranty. Milo Sport products identified with our warranty label have a 24 month warranty for all design and fabric defects and for workmanship, which shall be to the standards set by the company. Repairs undertaken under warranty do not extend the warranty period. The warranty does not cover mechanical damages caused by the use, or wear of elements and damages resultant from non-conformity to the instructions for use. Your statutory rights are unaffected.
